

The Emile range of resources has been developed by a group of teachers, academics and game developers. Together we have developed and supplied games-based learning resources to over 15% of the primary schools in the UK & Ireland. Our range of resources are all underpinned by robust pedagogical research and are tested rigorously by teachers in real classrooms.

All children have access to Emile, their logins are the same as TTRS. Username is usually the first 3 letters of their first name and first 3 letters of their surname eg: Archie Burrows would be 'arcbur'. The password is a randomly generated set of 3 letters. All children have access to these at school, and should bring home a copy to be able to log in at home.

Spelling is taught from Year 1 to Year 6, following the national curriculum. This can be found under 'Spelling Curriculum Map'. Most classes have at least 1 formally taught spelling lesson per week, these are then reinforced by online activities using the Emile App. Most classes do this twice a week. Teachers set children specific tasks based on spelling patterns, either the one that is formally taught that week, or one that a child particularly needs to practise. Once the tasks have been completed, children then have access to a variety of activities that are pitched to their spelling level. Therefore the app can always be used, even if a specific task has not been set.

Emile spelling is not part of our Homework Policy, however we do encourage that children are practising their spellings at home using a variety of games.
