# An update from... SCHOOL COUNCIL

News updates from Sheringham Community Primary School & Nursery

## Our focus is:

## SUSTAINABILITY

This term, the Gardening Club have taken the lead on an exciting new rewilding project as part of our school's commitment to sustainability and caring for the environment. They've transformed a quiet corner of the school grounds into a space where nature can thrive, planting native wildflowers, creating habitats for insects and other small wildlife, particularly bees. The aim is to increase biodiversity, support local ecosystems, and provide a space where natural processes can take place with minimal human interference.

The rewilding area is already beginning to attract life—insects have been spotted visiting the new wildflowers, and we hope that butterflies, ladybirds and bees may soon follow. By choosing plants that are native to the UK, the Gardening Club are helping to support the insects and animals that depend on them, creating a more balanced and sustainable environment.

School Council are learning about the rewilding project as part of their wider work on sustainability. They've been discussing how projects like this can play a role in tackling climate change, supporting pollinators, and educating others about the importance of looking after the natural world. Gail. From our gardening club, came to speak to us about it.

This project is a fantastic example of what can happen when pupils take the lead on positive environmental change. It gives everyone in the school community a chance to see nature up close, learn how ecosystems work, and understand the small but powerful steps we can take to help protect our planet. We're excited to see how the area develops over time and how it continues to inspire curiosity, care, and action.
